

Feature Highlights

As you know the new Nacra 500 mk2 is coming!

Vision

With the new Nacra 500 we want to enforce our new vision. We want to encourage, engage and empower all levels of sailors. This boat will be an accessible stepping stone into the world of catamaran sailing. The boat is infused with Nacra's experience in the high performance catamaran scene and makes this experience and knowledge accessible for all.

This catamaran will feel light, stiff and direct; Qualities you would expect from a Nacra.

The boat will be highly **durable, easy in use** and still a **thrill** to sail.

Sustainability

Hull construction, fabrication and, transport using sustainable materials:
Green certificate Vinyl Ester Resin (VER) from Renewable Resources;
Vapourless Vacuum Infusion process;
Composite foam (PET) from Renewable Resources;
Sustainable cloth fabric hull transport protection covers.

Specifications

1. Weight reduction of 15 kilograms of boat weight.
2. New low drag hull design for enhanced performance.
3. Increased skeg surface for better pitch stability and upwind performance.
4. Sails by Olympic Class Supplier Performance Sails.
